## REPORT OF DIRECTOR AND SCHOOL IMPROVEMENT COUNCIL

A Red Carpet School winner, a six-time Palmetto Gold winner, and Blue Ribbon Lighthouse School of Excellence (awarded in 2007), The Technology Center continues to provide a level of education that prepares students for college, the military, or work by employing a staff of 31 highly qualified teachers (one who is Nationally Board Certified) and a supportive staff. The Center serves over 1000 students per day from Bethune-Bowman Middle-High, North-Middle High, and Orangeburg-Wilkinson High School.

The presence of both academics and career and technology (CTE) courses on the same campus has afforded unique opportunities for academic and CTE integration. We are continually recognized for our successful integration practices. The Information Center was added which focuses primarily on increasing students' understanding of the relationship between academics and career and technology education classes as well as serves as a research center for our students.

Students are assured of a variety of career opportunities and a safe, clean, and nurturing environment. There are support programs to meet the needs of all students, such as a work-based experience, co-op, and student organizations which promote leadership competitions at the district, regional, state, and national levels, advisee-advisor program, dual credit and many others.

The Technology Center has maintained an excellent Report Card rating for the last six years. Our students continue to set high academic and technical standards. This is evident in that there were 219 vocational completers (the largest number of completers in the history of the school) for 2007-2008 and numerous awards granted to students in district, state, and national competitions. Several of our students placed first in state-level competitions to qualify to compete at the national level. One of our students was named the Lower Savannah Education and Business Alliance winner for 2008-2009. A record number of our students received gold, silver, and bronze medals and certificates for scoring at or above the national level on the Work Keys Assessment.

In 2008, nine of our cosmetology students passed the State Board Examination to become licensed cosmetologists. The Building Construction Program and the Masonry Program were NCCER certified in 2007; also, the Auto Collision Repair Program was NATEF certified in 2008. Plans are being made for 2008-2009 to add Animation and Gaming to our curriculum. The success of The Technology Center is also contributed to the many partners in higher education, business, community agencies, and parents.
